Thesis: The modern plan of our new Crestville High School provides three noticeable advantages over the old school.

- I. Having certain divisions in separate and isolated wings increases comfort and efficiency.
 - A. A separate area for science laboratories keeps the smell of chemicals from halls and classrooms.
 - B. The lunchroom is now at some distance from all classrooms.
 1. Cooking odors no longer permeate the halls and classrooms.
 2. The annoying noise of delivery service and garbage collection no longer disturbs classroom instruction.
 - C. A separate audio-visual room makes unnecessary the moving of cumbersome equipment.
 - D. The music department now has permanent and soundproof quarters.
 1. The noise of band and orchestra rehearsals does not interfere with class meetings.

2. Expensive musical instruments can now be safely stored overnight in lockers.

II. The new auditorium has brought about three improvements.

- A. Limited space no longer makes double-shift student assemblies necessary.
- B. Audiences like the comfort of the 2,000 overstuffed theater seats.
- C. A well-equipped stage permits expanded student activities in drama

III. The modern gymnasium permits expanded intra- and interschool athletics.

- A. Convenient to the gymnasium is parking space for 1,500 cars.
- B. All interested students and outsiders can be accommodated at indoor contests.
 - 1. Physical education classes now have ample space for all students.
 - 2. Bleachers for 4,000 spectators can be easily assembled and taken down.
