Director of Guidance

**John Deutsch**  
Administrator/Director of Athletics

**Carol Skidmore**  
Dean of Students/Mathematics

October 14, 2011

Dear Parents and Guardians:

In 2010, the North Hunterdon-Voorhees Regional High School District Board of Education approved an energy savings plan developed by Honeywell, a national leader in energy efficiency products and technology. This plan includes energy conservation measures that, once implemented, will reduce the district's energy consumption and expenses. The benefit of an energy savings plan is that the resulting energy cost savings will go to pay for the projects over a fifteen year period, which means in the end no additional money will be needed from the district's budget.

We are now at the implementation stage for these projects. As you may have noticed, temporary trailers have been placed in the former Polytech parking lot on the right side of North Hunterdon High School. These trailers will be there for the next several months while Honeywell installs and upgrades our equipment. Students who were parking in the former Polytech lot have been moved to the main parking lot.

We have been assured by Honeywell that the implementation of these projects will not interfere with our school day. Most of the work is to be done after school and when the school is closed.

We appreciate your patience during this construction process.

Sincerely,

A handwritten signature in black ink that reads "MP Hughes".

Michael P. Hughes  
Principal  
North Hunterdon High School
