Welcome to Effective School Solutions!

In the North Hunterdon-Voorhees Regional High School District

Making the difference for your child's success educationally, socially and emotionally.

ESS: Making the Difference

Effective School Solutions (ESS) is a state-of-the-art therapeutic program provided within North Hunterdon-Voorhees Regional High School District. The program provides each participating student with high quality, individualized clinical and related services so that he/she can fully benefit from all that his/her school has to offer.

The North Hunterdon-Voorhees Regional High School District has partnered with ESS in order to give your child the best possible opportunity to succeed on every level. The program is a proven success in public school districts in New Jersey, Connecticut and Pennsylvania that share your district's commitment to providing an outstanding educational experience for all students.

Your child will have the opportunity to participate during the regular school day in an array of clinical activities that include group, individual and family therapy. There are also monthly parent support and education meetings that you will find useful in your efforts to help your child overcome his/her emotional and behavioral challenges. Also, be sure to look for **Solutions**, a parent newsletter that ESS publishes and emails to ESS parents each month.

All services are provided at no charge to your family.

Unmatched Expertise

ESS has pioneered a new approach to providing services for students with emotional and behavioral challenges within the public school setting. With highly qualified licensed mental health professionals and innovative programming, ESS infuses the educational setting with a level of clinical expertise that a school district is unable to provide on its own. Since its founding in 2009, ESS has consistently demonstrated remarkable success in helping students thrive in their home district, on every level.

We Are Here to Help

In short, ESS is here to help your child succeed in school while providing the clinical support that can make the difference in both school and life. ESS and your school district are dedicated to providing all the help that is necessary for your child.

What Administrators Are Saying

"ESS is making such a difference for our students and our district. ESS students are attending classes, getting involved in school and are now able to benefit from all that our district can provide."

*Dr. Michael Weismann
Assistant Superintendent
Westfield, NJ*

"The ESS staff works tirelessly and collaboratively with our staff on behalf of our students to provide immediate therapeutic interventions to students. ESS provides necessary support services for students, staff, and parents to enable students to remain in a mainstream educational setting with their peers."

*John Pascale
High School Principal
Mahwah, NJ*

What Students Are Saying

"I never thought therapy and school would mix, but it seems to. I like knowing that I have someone to talk to during the day if I need to... and groups are pretty cool."

"ESS helps me get through the day."

"ESS helps me get focused for the school day ahead. I know if I'm having a tough time I can go speak to my counselor for support."

"If I had ESS in middle school, I would not have the problems that I have now."

"I thought I would hate this program and would want out. Now, I know that I need it and I want to stay."

"It (ESS) helps me with my daily working goals."

"I'm doing so much better because of this program. The counselors are great!"

What Parents Are Saying

"I don't know what we would have done without you guys; you took so much time and provided comprehensive support and clinical expertise. We were ready to give up and take him out of school."

"I can't say enough about the ESS program... I knew my son had it in him but it takes special people like you to pull it out of him... you are making our son the best he can be."

"I feel ESS is doing an excellent job in helping to address my daughter's issues. They have personally assisted in helping to get her out of the house and off to school. They spend time with her in school, providing invaluable individual attention. Their hard work and dedication has been paying off and I see my daughter attending school regularly now, something that didn't seem possible not so long ago. ESS has helped give my wife and I skills that enable us to understand and deal better with my daughter."

"We are grateful our son has had the opportunity to make a successful transition back to the high school with the help and support from the ESS program... Thank you so much!"
