Math contests give students an educationally enriching opportunity to participate in an academically-oriented activity and to gain recognition for mathematical achievement. Our main goal is educational: we promote enjoyment and study of mathematics by organizing contests for grades 4-12. Our contests help to enrich mathematics programs. Each contest covers topics appropriate to the contest grade level. Our well-written questions cover a variety of difficulty ranges and involve topics of interest to above-average students. The key is to encourage students to enjoy a challenge and to learn from it to find problem-solving discussions stimulating. This challenge is what prompts many youngsters to enjoy puzzle books! The enrichment we provide is a positive experience for students.

An interested high student should be able to solve 3 to 5 of the 6 problems. The 6th question is challenging for the most gifted students. Each school receives certificates of achievement for its highest scoring students on each grade level.

Voorhees competes against other high schools county and statewide. Upcoming dates of contests will be announced. Makeup dates will be available (generally within one week).
