

SAT Math club

Advisor: Ms. Barbara Tusa

Contact: btusa@nhvweb.net

- The club meets every Monday, after school, in room 326
- Students come on a voluntary basis to get help in mastering the SAT Math exam.
- Students are supplied with sample SAT Math problems that they work on independently, verify solutions, and go over in detail the problems that they did not understand, on a one-to-one basis.
- Students are taught a systematic fashion of mastering techniques used on the SAT Math test, review math concepts necessary in order to be successful in taking the exam, and are exposed to a variety of questioning styles seen on the SAT.
- The students strengthen their problem-solving skills in addition to their math skills.
- Students can link their College Board account with Kahn Academy to get a breakdown of their strengths and weaknesses on their last PSAT/SAT.
