

Technology Student Association (TSA) is an international Career and Technical Student Organization that reaches out to students who have interests and talents in technology of all sorts. The club offers its members opportunities to learn by competing in a wide array of exciting and challenging competitive events, showcase their hidden talents, and pursue their interests. The diversity of activities in TSA makes it a positive experience for every student. There are 33 high school-level events that range from Robotics Design to Music Production, all of which challenge students to use and improve their science, technology, engineering, and mathematics skills. Overall, TSA strives to prepare its members for the annual TSA NJ High School State Conference held at The College of New Jersey, where TSA members from various high schools in New Jersey compete in hopes of moving on to the National Conference.

Meeting Room: 167

Meeting Day: Wednesday after school

Advisor: Mr. Pickering

Sign up in September; Meetings run Sept-May

** New Members welcome at any time.*

Highlights include:

1. Compete in varied engineering challenges such as robotics, software, game design
2. Opportunities to Participate in Leadership Activities such as an Executive Board
3. Become an active member, learn and follow Parliamentary Procedure
4. A State Conference and Competition held at the College of New Jersey in March
