

Voorhees Photography Club
Advisor: Brianna O'Halloran
bohalloran@nhvweb.net

The purpose of Photography Club is to teach and inform students that have an interest in photography the basic photographic techniques and skills that are necessary to gain a unique perspective and capture unique images of the world around you. With the ever-increasing spread of accessible technology that takes place among high schoolers today, Photography Club would provide a positive use to the digital tools we have been given, in order to give students the opportunity to learn the incredibly powerful skill of photography.

Meetings will be held every other Tuesday in room 240.
