

1. Your summer assignment text can be found at:  
<http://www.nhvweb.net/vhs/math/runger/home-work-page/>.  
This is a copy of your textbook for next year. This is a review of pre-calculus and it will be assumed that you understand every concept and topic.
2. You should be able to complete all of the problems in a thorough and proficient manner. As you can read, problems with a gray background indicate problems that you should be able to solve without a calculator, and it is very important that you do so.
3. This assignment will be checked during the first couple of days of school. An assessment will follow.
4. If you look at my web site, I have kept the in class notes available on-line. You can simply click the link for many helpful hints if you need them.
5. Helping each other to understand the concepts and material is acceptable and encouraged. Copying of work is not.
6. You should have either a TI-83 or TI-84 graphing calculator for the class. They are a departmental requirement for the course. TI-89 calculators are allowed, but not necessary.
7. I have also attached the answer key from the back of the book for the majority of the odd problems, so that you can check your answers as you go.
8. Here are the problems that you should complete. Good luck. If you have any questions, I will be checking my emails periodically during the summer, I will try to get back to you as soon as I can.

p. 9, #1-37 odd, 41, 45, 47-52

p. 19, #1-53 e.o.o, 51, 57-62 (e.o.o = every other odd)alcu

p. 26, #1-17 e.o.o., 19, 21, 25, 33, 39, 41-46

p. 33, #1-21 odd, 23, 26, 37-42

p. 43, 25-43 odd, 46-49, 52-

p. 51, #1-21 odd 57

p52, #25-43 odd, 50-55
