Re: Annual Notification Required by AHERA-ASBESTOS

The North Hunterdon-Voorhees Regional High School District Board of Education in accordance with the Asbestos Hazard Emergency Response Act (AHERA) 40 CFR 763 requires all schools housing students in preschool through grade 12 to undergo inspections to determine the presence of Asbestos Containing Building Material (ACBM). If found, ACBM must be categorized according to the type of material, location, current damage/condition and potential for future damage. School Districts must keep on file a detailed Asbestos Management Plan. The Management Plan details the inspection finding and outlines the response actions the School Board intends to implement.

To accomplish these goals, the North Hunterdon-Voorhees Regional High School District Board of Education has on file at North Hunterdon High School, Voorhees High School and the District Office a NJ State Department of Health approved Asbestos Management plan for school facilities. The provisions provided with the Asbestos Management Plan are implemented and maintained in a timely and ongoing fashion. The Board of Education will ensure that a three-year re-inspection is scheduled and performed and will continue with scheduled six-month periodic surveillances as required by the AHERA regulations. It is the North Hunterdon-Voorhees Regional High School District Board of Education's goal to provide a safe and healthy facility for all students, staff and visitors.

The purpose of this letter is to meet the requirements under AHERA for written notice of the availability of the Asbestos Management Plan for review. Should you desire to review the Management Plan, please contact Robert Sabo, District Facilities Coordinator at rsabo@nhvweb.net or 908-638-2152 ext. 7396 for further information.
